Professional Summary

Aspiring DevOps and Cloud Engineer with hands-on experience in AWS, Linux, Terraform, Docker, and CI/CD pipelines through academic and self-driven projects. Passionate about cloud automation, infrastructure management, and building secure, scalable cloud solutions.

Education

Bachelor of Engineering – Artificial Intelligence And Machine Learning

Global Academy of Technology, Bangalore

CGPA: 8.07

Tools and Technical Skills

Cloud Platforms: AWS (EC2, S3, IAM, EKS, ECS, CloudWatch)

Containers: Docker, Kubernetes

Monitoring & Observability: Prometheus, Grafana

CI/CD: Jenkins, GitHub Actions

Version Control: Git, GitHub

Scripting: Bash, Python

OS: Linux (Ubuntu, CentOS)

Projects

Cloud-Based Health Reminder and Tracker System

- Developed a cloud-based application that enables users to manage medication schedules and receive timely health reminders.
- Deployed the application on AWS and Netlify to provide secure and reliable access across devices.
- Implemented cloud storage and notification workflows to support real-time health monitoring.

AWS Cloud Infrastructure Automation Using Terraform

- Automated the provisioning of AWS resources including EC2, VPC, S3, and IAM using Terraform.
- Implemented Infrastructure as Code practices to improve deployment consistency and reduce manual configuration efforts.
- Designed scalable and secure cloud infrastructure using version-controlled configurations.

AWS Bedrock-Based End-to-End Generative AI Application

- Built a serverless Generative AI application using Amazon Bedrock, AWS Lambda, Amazon S3, and API Gateway.
- Developed REST APIs to securely invoke foundation models and process user requests.
- Validated end-to-end workflows using Postman to ensure successful API integration and functionality.

Cloud-Native Kubernetes Deployment on AWS EKS

- Deployed containerized applications on Amazon EKS to create a scalable and highly available environment.
- Configured AWS networking components to support secure cluster communication.
- Integrated Application Load Balancer (ALB) to enable intelligent traffic routing and load distribution across worker nodes.

Certifications

Generative AI – Microsoft LinkedIn

AWS Solutions Architect Associate - Educative
